IN THE UNITED STATES PATENT AND TRADEMARK OFFICE  
Applicant: BRADFORD H. NEEDHAM § Group Art Unit: 2681  
Serial No: 09/243,701 §  
Filed: February 2, 1999 § Examiner: T. Davis  
For: LOCATION-BASED VEHICLE § Atty. Dkt. No.: INTL-0159-US  
MESSAGING SYSTEM § (P66)

Commissioner for Patents  
Washington DC 20231

REPLY TO PAPER NO. 8

Sir:

In response to the office action mailed November 7, 2001, reconsideration is requested in view of the following remarks:

Remarks

With respect to claims 15-19, the analysis set forth in the applicants' appeal brief section A is incorporated herein.

Claims 22-29 were rejected over the Kondou reference under §102(e).

Claim 22 calls for a processor-based system mountable in a vehicle that includes a position locating device coupled to the processor and a transmitter to transmit requests for information with appended position information. Moreover, claim 22 calls for a processor that sorts received information based on appended position information and identifies that information when the vehicle is proximate to a location associated with the information. Because the processor sorts received information based on appended position information, it is able to identify that information when the vehicle is proximate to a location associated with the information.

Date of Deposit: 11/2/01  
I hereby certify under 37 CFR 1.8(a) that this correspondence is being deposited with the United States Postal Service as **first class mail** with sufficient postage on the date indicated above and is addressed to the Commissioner for Patents, Washington DC 20231.  
Lisa O'Sullivan
